Re: United States v. Gladston Robb  
10 Cr. 398 (JGK)

Dear Judge Koeltl,

As you are aware, I was injured in an accident that occurred while I was in the custody of the United States Marshals Service (hereinafter "USMS") on June 21, 2010. Specifically, the van operated by the USMS, while attempting to exit the courthouse elevator that allegedly malfunctioned, hit the curb of the elevator.

On or about July 26, 2010, you ordered the U.S. Attorney's Office (hereinafter "Government") to submit a report to the Court by August 2, 2010 regarding the USMS' investigation of the accident and my medical treatment. By close call, the Government submitted said report on August 2, ~~200~~ 2010 to the Court.

Firstly, I would like to personally thank this honorable Court for its much needed intervention and for its sincere concern for my wellbeing. Secondly, I would like to bring a few issues to the Court's attention in response to the Government's report.

I was "treated" - in the words of the Government - by the Bureau of Prisons Health Services (hereinafter "BOPHS") on June 22, 2010; July 13, 2010 and finally as a result of the Court's order, July 30, 2010. As the records submitted by the Government indicate, I was only actually seen by a Medical Doctor when this Court intervened and the Legal Department here at MDC forwarded

that order to the BOPHS. The two prior dates of "treatment", June 22 and July 13, 2010 respectively, I was not seen by a Medical Doctor. Instead of being seen by an MD, months went by while my physical and psychological ailments went undiagnosed and only "treated" with pain medication. As a result of the Court's order, I was seen by a Medical Doctor who himself referred me to see a specialist - a neurologist.

Even more troubling is the fact that, the Government and the BOPHS did not follow through with their representations to the Court that my appointment with the neurologist would occur on August 6<sup>th</sup>, 2010. Instead, I was scheduled for that consultation not on August 6, but sometime thereafter and because the BOP was late in getting me to the appointment, it was cancelled. Specifically, on a date (not August 6, 2010) I can't recall, I was taken by the officers here at MDC to a 3pm appointment, at 4:15 pm. The officers exited the building at 4:15pm and telephoned the neurologist's office while at the front gate to inquire if the appointment could still be salvaged; it could not.

To date, I have not seen the neurologist, nor have I been told anything (despite several inquests) about when I can be seen by the neurologist. I respectfully beg this Court for yet another intervention as I am having both physical and psychological effects as an aftermath of the accident.

Thank you.  
Respectfully submitted,

Defendant - Gladston Robb
